What is Information Security Management Professional (ISMAS)

At this time, the media are full of all kinds of issues that are related to Security. Privacy sensitive data is no longer safe, but are shared globally. Leaks in security software provide hackers with plenty of opportunities. Social media is used for information gathering. Management is increasingly concerned on how to comply with the statutory requirements. And perhaps more importantly, how to prove that you have secured to a sufficient extent so that the measures applied are appropriate and effective.

The training ISMAS is the sequel to the ISFS training and based on ISO/IEC27002. It will contribute to the management aspects that need to be seen regularly in the Security field from the perspective of Business, Customer and Supplier. It provides this content by examining risk management aspects and assurance through Controls. The training is especially suitable for anyone who needs to understand the governance aspects of security and knowing how to demonstrate compliance adequately against the applicable laws and regulations.
