

Introduction Data Analysis (NL)

Group Training

Training code	CGAINDA-CD
Spoken Language	Dutch
Language Materials	English
Dayparts	2
Price	€800,00 excl. VAT No extra costs.

What is Introduction Data Analysis

Are you also having huge amounts of data and not sure what to do with it, except that you definitely have to do something with it? What information and insights are in your data and how can you extract it?

During the Introduction Data Analysis you learn to take the first steps towards the work of a Data Analyst or Data Scientist, so that you can gain value from your data yourself.

You will be introduced to different types of data, such as:

- Structured Data
- Unstructured Data
- Semi-structured Data
- Nominal Data
- Ordinal Data
- Discrete Data
- Continuous Data

and various forms of data analysis:

- Qualitative Data Analysis
- Quantitative Data Analysis

We will discuss the data analysis process and go through the first steps together. During practical exercises you are challenged to apply the theory you have learned.

During the training, the way of thinking of a data analyst and its application are central. The training is given by people who process and analyze data in their daily work and who are happy to share this knowledge.

Who should attend Introduction Data Analysis

The training Introduction Data Analysis is suitable for:

- Starters at the start of their career

- People who want to learn to create insights through data
- People working in IT, especially in departments such as Data Management
- People who want to become a Data Analyst
- People who want to become a Data Scientist

Prerequisites

There are no specific requirements to participate in this training.

During this training you need a laptop with access to internet.

Objectives

After this training, the participant is able to answer the questions:

- What different types of data and data analysis are there?
- Which steps are taken during a data analysis process?
- Which forms of visualization are suitable depending on the type of data and the process step?
