What is Testing and sustainability

Ready to integrate sustainability into your testing practices?

This entry level training delves into the crucial intersections of testing and sustainability, empowering you as a test professional to contribute to a greener future.

Gain a competitive advantage by adhering to CSRD regulations before they become mandatory for your own or your clients organization.

Demystify Sustainability Testing by knowing the difference between "testing for sustainability" and "testing sustainably".

Join us for an interactive training with group discussions, excercises and practical tips&tricks for your everyday life as a testing professional.

Who should attend Testing and sustainability

This training is meant for testing professionals of all levels ranging in roles.

- Test engineers, managers, and quality assurance professionals
- Product developers and sustainability officers
- Business leaders seeking to incorporate sustainability into their testing operations

Prerequisites

Prior to the training you need to have:

- Basic awareness of sustainability related topics such as Carbon emissions, CSRD, Sustainable development goals, etc. to be obtained through e.g. Sustainability awareness training at Capgemini Academy
- Basic knowledge of Tmap
- Basic knowledge of testing

Objectives

You learn how to integrate sustainability into your testing practices ranging from day-to-day activities to strategies and test architecture. Whether that means to optimize your current efforts to minimize their carbon footprint or integrate sustainability as a quality characteristic into your future test plans and strategies.
